

inomed takes over EEG systems of Walter Graphtek Product portfolio expanded – new inomed subsidiary founded in Lübeck

inomed Medizintechnik GmbH (Emmendingen, Germany) took over the EEG product line of Walter Graphtek GmbH (Lübeck, Germany). From now on, inomed will distribute the computer based high-quality EEG systems of Walter Graphtek throughout the world, and serve as the exclusive contact for healthcare professionals in clinics and medical practices.

The innovative medical technology manufacturer thus expands its existing line of neurological diagnostic products, and combines technical competencies as well as high service quality of both companies. Consequently, inomed will strengthen its position in the field of neurological diagnostics while remaining true to its policy of superior service and technical excellence.

Successful in the market

Walter Graphtek's EEG systems have been successfully marketed for decades, and offer, as a result of continued development, a maximum of technical performance in the field of neurological diagnostics. inomed Medizintechnik GmbH initially will integrate a product line of three different EEG systems into its portfolio, and effectively link it to its existing systems operating in the areas of Intraoperative neurophysiological monitoring, functional neurosurgery, and pain treatment.

"By acquiring the EEG system product line of Walter Graphtek, our division of neurological diagnostics perfectly is complemented, opening up new opportunities for us in this market segment", Rudi Mattmüller, managing director of inomed, explains. "Walter Graphtek systems have quite rightly gained a very good reputation. Of course we intend to take advantage of it, and extend it by ongoing quality improvements."

New inomed subsidiary in Lübeck

In conjunction with the acquisition of the flexible EEG products, inomed has founded a subsidiary in Lübeck, which will continue to carry out a part of the sales, service and support related to EEG systems. inomed thereby integrates the Walter Graphtek staff into its new subsidiary.
